## New York State School Districts

# Statewide Trends

ASBO New York is pleased to present its sixth annual School District Factbook for your information and use. The Factbook was designed to provide up-to-date data to state policymakers, especially state legislators. It includes maps of 674 major school districts, including the Big 5 city school districts, in each legislative district. It has information on each school district including spending, tax levies, state aid, student need, and the percentage of each school district's area that is included in each legislative district. Data on Foundation Aid still due provide a school district level breakdown of the \$4.1 billion needed to fully implement the foundation formula. Also included are prior year adjustments approved by the State Education Department and owed to school districts.

Spending for school year 2017-18 was \$71.4 billion, a 4.1 percent increase from the year before. The total proposed tax levy for school year 2018-19 was \$21.8 billion, a 2.3 percent increase over the year before. School districts levied \$132 million less than the maximum allowable under the Tax Cap law. During the 2017-18 school year, 2.7 million students were enrolled in New York, a 0.2 percent decline compared with the year before. Average spending per student statewide was \$26,878, a 4.3 percent increase.

School districts will receive \$26.2 billion in state school aid for 2018-19, including \$2.9 billion for school construction. This leaves \$4.1 billion in Foundation Aid still due to school districts. Foundation Aid is intended to offer all students the opportunity for a meaningful high school education, according to the laws enacted in 2007 and still in effect today.

Data Sources include data supporting the 2018-19 New York State Enacted Budget, Tax Cap data from the Office of the State Comptroller (as of November 15, 2018), and Annual Financial Report Data (ST3) for school districts for school year 2017-18 (as of January 3, 2019).

# Educating the Whole Student

ASBO New York approaches state aid from the unique perspective of school business officials. New York’s school business officials, who act as Education CFOs, are strategically positioned to understand education goals and the resources needed to achieve them. For 2019-20, ASBO recommends a \$2.1 billion increase in state aid to school districts to achieve four goals:

- Improve equity and adequacy for school districts with additional support for Foundation Aid and other strategic investments aimed at improving access to educational opportunity;
- Strengthen student safety and wellness with a new aid program to support the non-capital needs of all school districts to provide community school programs, support school resource officers, and other initiatives to strengthen student safety and meet the social and emotional needs of students. The Community Schools Setaside within Foundation Aid should be folded into this separate categorical aid program, leaving Foundation Aid as unrestricted general purpose operating aid;
- Provide stability by paying for already approved expenses. Maintain support for expense based aids, and pay off prior year adjustments; and
- Redirect savings to teaching and learning through incentives for shared transportation, staggered building condition surveys, streamlining internal audits, excluding local BOCES capital expenditures from the Tax Cap, a TRS reserve, and funds to support grants for strategic resource use. Additional flexibility will help school districts do their primary job—educating students.
