FIRST MAN ON THE MOON

'One small step for man, one giant leap for mankind'

By Alan Watts, News of the Moon and Landing

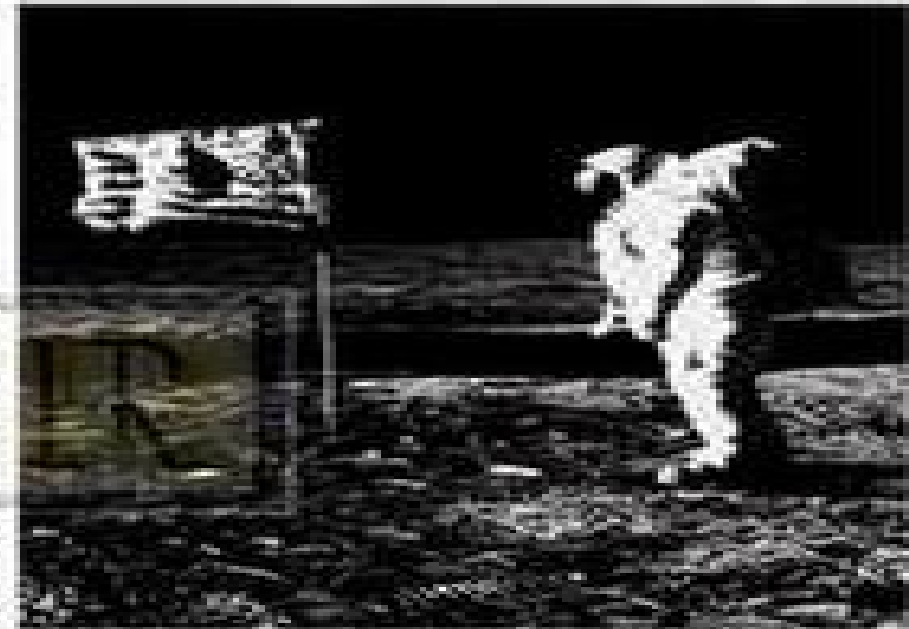

THE APOLLO 11 SPACECRAFT HAS LANDED ON THE MOON AND THE FIRST MAN HAS SET FOOT ON THE SURFACE OF THE MOON.

At 10.56 a.m. Greenwich Mean Time, the Apollo 11 lunar module, Eagle, touched down on the moon's surface. The landing was made in the Sea of Tranquility, about 20 miles from the lunar equator.

The lunar module, Eagle, is the first of two spacecraft to be launched from the Apollo 11 command module, Columbia, which is in orbit around the moon. The lunar module will remain on the moon for about two weeks, during which time the two astronauts will conduct a series of experiments and collect samples of lunar rock and soil.

The lunar module is a small, two-wheeled vehicle which is capable of carrying two astronauts and their equipment. It is powered by a nuclear reactor and has a life support system which will allow the astronauts to survive for up to 14 days on the moon.

The lunar module is the first of a new generation of spacecraft which will be used for lunar exploration. It is designed to be simple and reliable, and to be able to operate in the harsh conditions of the moon's surface.

APOLLO 11 LUNAR MODULE ON THE MOON'S SURFACE. THE FIRST MAN HAS SET FOOT ON THE SURFACE OF THE MOON.

Triumph for Apollo Crew

THE APOLLO 11 CREW HAS COMPLETED THEIR MISSION AND IS BEING RECALLED TO EARTH. THE CREW CONSISTS OF COMMANDER MICHAEL SMITH, COMMANDER MATTHEW SCOBLETT, AND LUNAR MODULE PILOT JAMES LOVELL.

The Apollo 11 crew has completed their mission and is being recalled to Earth. The crew consists of Commander Michael Smith, Commander Matthew Scoblett, and Lunar Module Pilot James Lovell. They have spent 21 days in space, during which they have conducted a series of experiments and collected samples of lunar rock and soil.

The Apollo 11 mission has been a triumph for the United States and for the world. It has shown that man is capable of reaching the moon and returning safely to Earth. It has also shown that the moon is a rich source of minerals and that it may be a valuable resource for the future.

THE APOLLO 11 MISSION HAS BEEN A TRIUMPH FOR THE UNITED STATES AND FOR THE WORLD. IT HAS SHOWN THAT MAN IS CAPABLE OF REACHING THE MOON AND RETURNING SAFELY TO EARTH. IT HAS ALSO SHOWN THAT THE MOON IS A RICH SOURCE OF MINERALS AND THAT IT MAY BE A VALUABLE RESOURCE FOR THE FUTURE.

PETTITSS

The advertisement for Pettitss features three small images: a man in a suit, a woman in a dress, and a dog. The text 'PETTITSS' is prominently displayed in the center of the advertisement.

That was a headline
from the newspaper

- Neil said “the eagle has landed”
- Then said “ one small step for man, one giant leap for mankind
