Welcome to Science Olympiad Evening

Students will have an opportunity to share their knowledge and designs in the various fields of science. Student teams will compete against their peers in the fields of their choice to demonstrate their skills.

Trajectory: Room- Café B Time-6:00-7:30

Competitors build a trajectory apparatus which can launch a given object at two different target points.

Write It/Do It: Room- Time-6:00-8:00

In teams of two, one individual will write directions for a given 3D design. The partner will then be given their teammate's directions to rebuild their apparatus.

Mission Possible: Room- Time-6:30-8:00

Competitors build a Rube Goldberg apparatus based on given specs. The team who builds closest to the specs and best functioning will win.

Ornithology: Room-112 Time-7:00-8:00

Competitors will be asked to identify birds of North America based on morphology, vocalizations, ecology, and behavior.

Elevated Bridge: Room-Café A Time-7:30-8:30

Competitors are asked to design a bridge based on specific parameters. The bridge which can withstand the greatest stress will be the winner.

Science Bowl: Room- Heritage Room Time-8:30-9:00

Two teams of five students will compete in a high stakes fast paced question based test. Similar to Jeopardy...
