

Huntington Union Free School District

"A Tradition of Excellence since 1657"

James W. Polansky

Superintendent of Schools

June 16, 2016

Dear Parents and Guardians,

This letter is to inform you that the district has conducted water sampling and lead testing during the past several weeks. Results are attached.

You will note that samples were taken from nearly 200 locations across the district, which include any and all sources of potable water. As highlighted in the results, acceptable lead levels (threshold of 15 parts per billion) have been reported in all locations. Any locations where samples initially tested at or above the threshold were addressed immediately by taking the source offline and replacing the associated fixture.

Also attached is a "Question & Answer" document that provides information on water sampling and lead levels, as well as sources of related resources. Please be advised that the district will continue sampling and testing routinely.

Sincerely,

James W. Polansky
Superintendent of Schools
